

# SAVE MONEY EVERY TIME YOU PRINT!

## Stop The High Cost Of Ink And Start Saving Money- **TODAY!**

InkSaver allows you to control the amount of ink used by your printer, making your ink cartridges last longer. Using patent pending software algorithms, InkSaver optimizes printer data so that your printer uses less ink – even when printing at your inkjet's highest resolution. Over the past 18 years, the team at Strydent has developed Printer Improvement Software for the largest companies in the printer industry. Now, Strydent has focused that printer software expertise into the creation of InkSaver.

**Saves Money** By lowering your ink consumption, InkSaver extends the life of your ink cartridge and saves you money.

**InkSaver Makes Printing Affordable** Inkjet printer prices have plummeted, but the cost of ink cartridges has remained high. A typical user may spend more than \$600 on ink over the life of their printer. InkSaver slashes the cost of printing by putting you in control of your ink consumption.

**The InkSaver Solution** InkSaver works with your printer to reduce your ink consumption without

sacrificing print quality. You can configure your ink savings once and never worry about it again, or you can adjust your savings level for every document you print. With InkSaver, you will save money every time you print.

**Works with the Most Popular** InkSaver is compatible with most HP, EPSON, and Canon color inkjet printers, and InkSaver works with your original ink cartridges, 3rd party ink cartridges, and refill kits. See compatibility chart below.

Hewlett-Packard	Epson	Canon
Deskjet 900 Series	Stylus C80	i550
Deskjet 800 Series*	Stylus C70	S820
Deskjet 600 Series	Stylus C60	S750
