InkSaver: Save money on printer cartridges

LAST UPDATE: 9/20/2002 9:51:24 PM
 Posted By: [Michael Tholkes](#)

Since I mentioned InkSaver on News 4 San Antonio Today about a month ago, users continue to write in and ask about it – so here's the info...

InkSaver is a little software application that allows you to control the amount of ink used by your printer, making your ink cartridges last longer. It works much better than just using the standard draft mode that's included in most printer software.

Although going below InkSaver's fifty percent quality setting really degrades the quality beyond my standards, you will notice your print cartridge lifespan increase – saving you serious cash. Anything above the 50% setting should do nicely.

Here's the cool part – You can download a free 15 day trail copy of the software from their website! If you like it, buy it (\$35) – or just uninstall it if you don't like it.
